SUMMARY

AI/ML Engineer with 2+ years of experience developing machine learning and natural language processing solutions. Experienced in Python, SQL, NLP, deep learning, transformer architectures, and predictive analytics. Strong background in developing end-to-end machine learning pipelines and deploying AI applications using FastAPI and Docker.

EDUCATION

Delhi Institute of Technology, New Delhi

Bachelor of Technology — Artificial Intelligence & Machine Learning, CGPA: 8.7/10, Relevant Coursework:, 2022 – 2026
Machine Learning, Deep Learning, Natural Language Processing, Data Structures & Algorithms, Database Management Systems, Computer Vision, Statistics

EXPERIENCE

Machine Learning Engineer

July 2025 – Present

TechNova Analytics Pvt. Ltd., Gurugram, India

- Developed NLP pipelines for automated document classification and information extraction.
- Built text classification models using Python, Scikit-learn and Transformer-based architectures.
- Developed REST APIs for machine learning models using FastAPI.
- Improved document classification F1-score from 81% to 91% through feature engineering and model optimization.
- Implemented semantic search using Sentence Transformers and cosine similarity.
- Containerized machine learning services using Docker.
- Worked with PostgreSQL for storing candidate and model-generated data.
- Technologies: Python | NLP | Transformers | Scikit-learn | FastAPI | PostgreSQL | Docker | Git

AI/ML Intern

January 2025 – June 2025

DataVision Labs, Noida, India

- Developed sentiment analysis models for customer feedback.
- Performed text preprocessing including tokenization, stopword removal and lemmatization.
- Built Named Entity Recognition pipelines using spaCy.
- Created data preprocessing workflows using Pandas and NumPy.
- Evaluated classification models using Precision, Recall and F1-score.
- Created interactive analytics dashboards using Power BI.
- Technologies: Python | NLP | spaCy | Pandas | NumPy | Power BI | SQL

PROJECTS

ResumeIQ — AI-Powered Resume Intelligence Platform | Technologies: Python, FastAPI, spaCy, Transformers, Sentence Transformers, PostgreSQL, React

- Developed an NLP-powered resume parsing system capable of extracting candidate information from PDF and DOCX documents.
- Implemented Named Entity Recognition for detecting names, organizations, job titles, education, skills and dates.
- Developed a hybrid skill extraction system using NLP and a structured skill taxonomy.
- Implemented semantic resume-job matching using Sentence Transformers.
- Created candidate ranking and skill-gap analysis functionality.

- Developed an interactive recruiter dashboard for candidate analytics.

Medical Text Disease Classification System | Technologies: Python, NLP, Scikit-learn, Transformers, FastAPI

- Developed an NLP system for analyzing medical text and classifying potential disease categories.
- Applied text preprocessing, TF-IDF and transformer-based embeddings.
- Compared multiple machine learning models using Precision, Recall and F1-score.
- Built a FastAPI endpoint for model inference.

MarketMind AI — Market Basket Analysis | Technologies: Python, Pandas, Scikit-learn, NLP, React

- Developed a recommendation and market basket analysis platform.
- Implemented association rule mining to identify frequently purchased product combinations.
- Used NLP techniques to normalize and categorize product descriptions.
- Created interactive product analytics and recommendation visualizations.

TECHNICAL SKILLS

Python

Java

C++

SQL

JavaScript

Machine Learning

Deep Learning

Natural Language Processing

Computer Vision

Generative AI

Predictive Modeling

Named Entity Recognition

Text Classification

Tokenization

Lemmatization

Sentiment Analysis

Semantic Search

Text Embeddings

Transformers

Scikit-learn

TensorFlow

PyTorch

Hugging Face Transformers

FastAPI

Flask

REST APIs

PostgreSQL

MySQL

MongoDB

Docker

Git

GitHub

Linux

Pandas

NumPy

Matplotlib
Power BI
Excel

CERTIFICATIONS

Machine Learning Specialization — Coursera — 2025
Natural Language Processing with Transformers — Hugging Face — 2025
SQL for Data Analysis — DataCamp — 2024
Microsoft Power BI Data Analyst — Microsoft — 2025

ACHIEVEMENTS

- Developed an NLP classification system achieving 91% F1-score on a document classification dataset. - Selected among the top 10 teams in a university-level AI/ML hackathon. - Published a technical article on semantic search and transformer-based embeddings. - Mentored junior students in Python and machine learning fundamentals.

LANGUAGES

English — Professional Hindi — Native French — Basic

INTERESTS

Natural Language Processing Generative AI Machine Learning Research Quantitative Finance Data Analytics

DECLARATION

I hereby declare that the information provided above is accurate and complete to the best of my knowledge.
