SUMMARY

Creative and user-focused UI/UX Designer with 3+ years of experience designing intuitive digital products, web applications, and mobile experiences. Skilled in user research, wireframing, prototyping, usability testing, information architecture, and design systems. Experienced in collaborating with product managers, developers, and business teams to transform complex requirements into simple and engaging user experiences.

EDUCATION

Delhi Institute of Technology, New Delhi

Bachelor of Technology — Computer Science & Design, Relevant Coursework: Human-Computer Interaction, 2020 – 2024
User Experience Design, Interaction Design, Web Development, Design Thinking, Information Architecture

EXPERIENCE

Product Designer

June 2024 – Present

PixelCraft Technologies

New Delhi

- Designed responsive web and mobile interfaces for SaaS and consumer applications.
- Conducted user interviews, usability testing, and competitor research to identify user pain points.
- Created user flows, wireframes, high-fidelity prototypes, and interactive prototypes using Figma.
- Developed reusable design-system components that improved design consistency across products.
- Collaborated with product managers and engineers throughout the product development lifecycle.
- Improved onboarding experience by redesigning user flows based on usability-testing feedback.
- Created interactive prototypes for stakeholder presentations and product validation.
- Worked with developers to ensure accurate implementation of designs.

UI/UX Designer

July 2023 – May 2024

DesignLabs Studio

Gurugram

- Designed websites, dashboards, mobile applications, and landing pages for multiple clients.
- Conducted user research and translated findings into personas and journey maps.
- Created information architecture, wireframes, prototypes, and visual designs.
- Performed usability testing and incorporated user feedback into design iterations.
- Worked closely with frontend developers to maintain design consistency.
- Created visual design guidelines and reusable UI components.
- Presented design concepts and product decisions to clients and internal stakeholders.

PROJECTS

FinFlow — Personal Finance Mobile App | Designed a mobile application that helps users track expenses, manage budgets, and understand their financial habits.

- Conducted user research
- Created user personas
- Designed user flows
- Developed wireframes
- Created high-fidelity Figma designs
- Built interactive prototypes
- Conducted usability testing

ResumeIQ — AI Resume Screening Platform | Designed the complete user experience for an AI-powered recruitment platform that allows recruiters to create jobs, upload resumes, analyze candidates, and compare candidate-job compatibility.

- Designed recruiter dashboard
- Created job creation workflow
- Designed resume upload experience
- Designed candidate screening interface
- Created interactive candidate profiles
- Designed AI match-score visualization
- Designed skill-gap analysis
- Created NLP annotation interface
- Developed reusable design components

TravelEase — Travel Planning Platform | Designed a responsive travel-planning platform that allows users to discover destinations, create itineraries, and organize travel activities.

- User research
- Information architecture
- Wireframing
- UI design
- Responsive layouts
- Interactive prototype
- Usability testing
